

# Dido designs by caroline mansouri

Dido lighting is designed by Caroline Mansouri in Melbourne and is handcrafted by artisans in Tunisia. The lights are a blend of western simplicity and intricate North African metal work. Made from brass, the shades vary in colour from the warmth of antique patina to the brilliance of nickel.

Every hole is individually pierced and every joint is soft soldered to produce unique pieces.

Dido lighting creates mood and works well with energy efficient globes as the small perforations in the brass soften the harshness of fluorescent light. Incandescent bulbs create shadows and reflections on nearby surfaces.

Dido shades have been designed to function as pendants, table or floor lamps.

The light stands come in a variety of styles and heights and are hand made in Tunisia from iron. All lighting is wired in Melbourne.

Brass shades provide the option for use in external settings.
